

Building Momentum in Middle School

More Success
for More Students

Help Students Meet Grade-level Expectations

Middle school is the time to make sure learning gaps are filled and all students have mastered grade-level standards. Apex Learning middle school digital curriculum is built for middle school students: their attention spans, their interests, and their needs.

What Works for Students

Close Learning Gaps

Identify and address student needs:

- Pretests identify precise grade-level deficiencies
- Age-appropriate remediation, down to the elementary level, fills gaps
- On-grade instruction and practice build proficiency and prepare students for the next grade
- Scaffolds and supports help all students, including ELL and struggling students, master skills and concepts

To be successful, students must not only fill gaps but also master on-grade standards.

Raise Exam Scores

Ensure a personalized path to exam success:

- Differentiated learning plans address the needs of students below, at, and above proficiency
- Guided instruction focuses on test-specific and remedial skills and concepts
- Non-scored practice provides the feedback students need to correct misconceptions and confirm learnings

Standards-aligned instruction with practice gets better results than practice alone.

Expand Learning Options

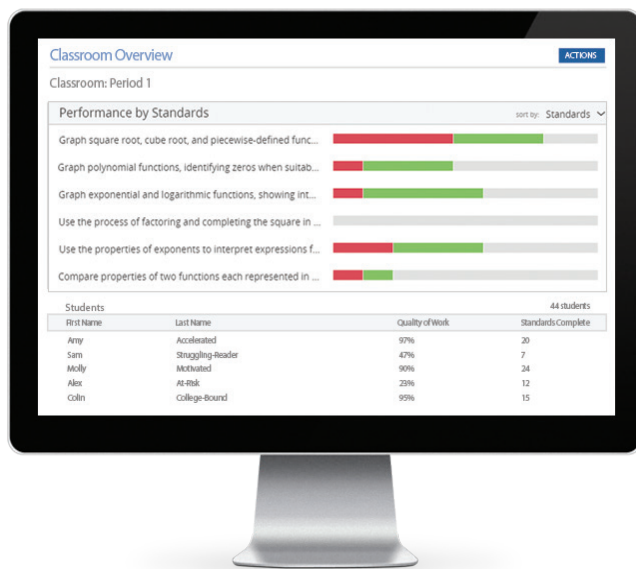

Support students who need something different than the traditional classroom:

- ELA, math, science, social studies, and world languages courses are available
- Virtual offerings can be supported by your teachers or ours

Research shows that students who use Apex digital curriculum perform as well or better than students who don't Apex.

Insight for Teachers

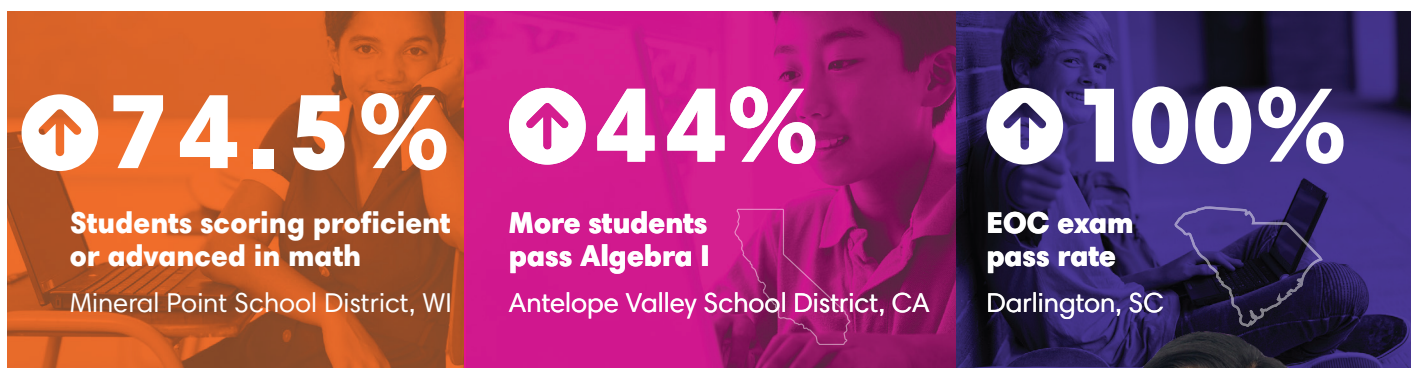

Middle school teachers are at the forefront of personalizing learning. To amplify their efforts, Apex Learning puts key information at teachers' fingertips so they can quickly identify which students need help and what each student needs help with.

- **Dashboards** enable at-a-glance monitoring of class and student achievement
- **Standards-based reporting** provides visibility into student proficiency and readiness
- **Stakeholder reports** extend communication to counselors, parents, and other stakeholders

Results for Administrators

Districts that use Apex Learning get results on key metrics such as class passage rates and high-stakes test scores.

The Power of People Who Know

Digital curriculum alone will not get the results you desire for your students. That's why the combined power of your teachers and our Success Managers is vital to achieving outcomes.

Our dedicated Success Managers partner with you and customize the support they provide—from strategy and planning, to best practices in the classroom, to ongoing program evaluation and optimization—to drive more learning for students and increased results for districts.

The Apex Advantage

More Success for More Students

Whether it's in the classroom, a specific program, or an extended day or year setting, the Apex Advantage delivers more, preparing middle school students for the next grade, the next test, and the rigors of high school.
