

# Summer School

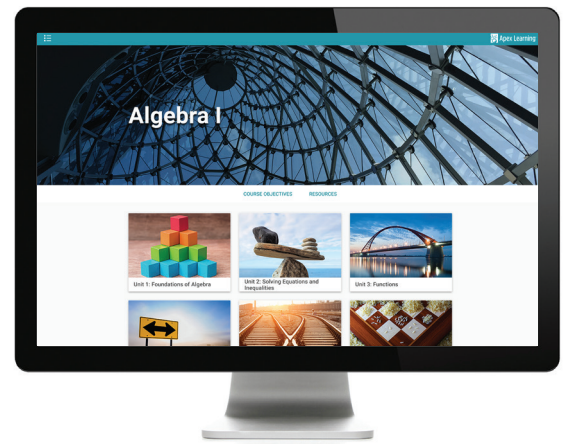

## Tailor a Summer School Program to Meet Your Needs

School districts are often challenged to implement a cost-effective summer school program that addresses the diverse needs of its students. With digital curriculum from Apex Learning®, schools can offer the personalized learning experience necessary for a successful summer school program.

### Differentiate Instruction to Meet Individual Needs

Apex Learning digital curriculum harnesses the power of technology to differentiate instruction. Students can progress at their own pace, taking as much time as necessary to master the material. Direct instruction incorporates media along with instructional text to provide multiple representations of concepts to address different learning styles.

### Prescriptive Features for Key Courses

Prescriptive pretests identify what a student has learned previously and areas of deficiency for each unit of content. An individualized learning plan is automatically generated based on pretest results to direct each student to the specific material they have yet to master.

## Implement Virtual Learning When Local Teachers Are Not Available

School districts often struggle to find certified teachers to staff summer school programs. Apex Learning offers a solution to this problem: Apex Learning Virtual School. Students can enroll in online courses during the summer with instruction provided by highly qualified, subject-certified Apex Learning online teachers. A computer with an Internet connection is all that is needed to access their online courses.

## Create Cost Efficiencies

Summer school subscriptions start at just \$25. Contact your Apex Learning representative today to increase student achievement and save time and money with an Apex Learning summer school solution.

“ Our teachers complained that students could complete other online summer school courses in a matter of hours. They felt that compromised the value of our high school diploma. We decided to implement Apex Learning Courses because they are standards-based and rigorous.”

—Dianne Vaez, K-12 Curriculum,  
Instruction, and Assessment Director  
Temecula Valley Unified School District California
