Best Practices
Helping Struggling Students Succeed

Introduction

Students who are struggling often need assistance with one or more of the following:

- Time management
- Motivation
- Mastering a skill or concept

Struggling students can be identified quickly through sophisticated yet simple features in the learning management system. Teachers can quickly employ intervention strategies to help these students complete course work successfully.

Strategies to Support Struggling Students

1. Monitor Student Performance

Monitor progress and performance from the Course Overview page. This powerful tool provides a snapshot of each student's performance in a classroom. Go to your dashboard, expand a course, and click the data icon (i). From here you can view a summary of student progress and additional reports.

2. Establish Daily Progress Goals

Use the due dates to pace students through courses. This practice increases on-time completion rates. Teachers can set due dates² for scored activities in the Grade Book. Allow a reasonable amount of time for students to complete a course, taking into consideration the approximate course duration and the amount of time allotted for work during the regular school day.

In a traditional schedule, students are expected to complete 4.5 hours of work per course each week. Students who adhere to this guideline will be on track for course completion for most courses.

Calculating Weeks to Semester Completion

Weeks to complete = Hours of course duration divided by the hours of on-task time per week

Example: Weeks to complete (17.78) = Biology Core (80) ÷ Hours of on-task time (4.5)

In this scenario, a student would be expected to complete a semester course in 18 weeks.

3. Conduct Weekly Progress Meetings

Hold students accountable in weekly progress meetings to attain higher on-time course completion rates. Frame the weekly meeting around the Activity Scores report along with the student written work portfolio containing study sheets, practices, journals, labs, and review guides. Review work samples and progress toward course completion with each student. Congratulate students who meet deadlines and discuss time management and academic support strategies with students who are behind.

4. Encourage Students to Use Dashboards

Have students take ownership of their academic progress by encouraging them to frequently monitor their Dashboard page. This page provides a snapshot of progress and performance in each course.

5. Provide Instructional Intervention
Develop instructional intervention strategies in your classroom to assist students who are struggling.

**Small-Group Targeted Instruction**
Use assessment and progress data to identify and group struggling students to provide appropriate interventions. Consider enlisting additional support from resources teachers, peer mentors and tutors.

**Individual Direct Instruction**
Provide just-in-time direct instruction to individual students who have difficulty with a concept or skill.

Teachers can access Activity Detail reports[^1] to review student performance on assessments.

6. Motivate Students to Stay on Track
Several strategies can be employed by teachers to help motivate students to complete courses on time.

**Create a Student Wall of Fame**
To motivate students and reward progress, post each student’s name on an index card along a unit timeline on a bulletin board or classroom wall. Use stars to indicate completed courses.

**Offer Weekly Incentives**
- Music Mondays: Allow on-track students to listen to music while completing work.
- Food Fridays: Provide a snack or lunch each week for all on-track students.

7. Communicate Student Progress to Parents and Guardians
Students have higher on-time completion rates when parents and guardians are aware of their progress.

- Set up parents and guardians as coaches to receive an automated weekly Progress Report.
- Send an additional communication when students drop below acceptable progress indicators and outline steps students can take to get back on track.

**Example Coach Report Summary**
At the top of the Detail Report is a summary, like the summary provided in the weekly email.

Course Access Log

This area displays session information for each day in the report week.

Duration is the amount of time the course window was active for the given course and day. Hours describes the cumulative amount of time spent viewing and interacting with unique instructional (dark green) and assessment (light green) pages.

- Teacher and Site Coordinators can add coaches by editing a student account.
- Communicate progress with parents using the Coach email report.

8: Conduct a Learning Conference

If a student continues to make unsatisfactory progress after the teacher has conducted progress meetings and contacted the parent, consider setting up a learning conference. Teachers invite a parent and a counselor to join meet with the student to discuss educational goals and how the student can get back on track. At the end of the conference a learning contract is created to document steps that will be taken to get back on track for successful course completion.

Getting Support

To access online help at any time, sign into Apex Learning and click Help in the main menu. Apex Learning Support

- Monday – Friday. 5:00 AM – 7:00 PM Pacific Time
- 1-800-453-1454 option 2
