

Double Dosing

Close learning gaps in math and ELA.

Use for Increasing:

Grade-level readiness

Passing rates and promotion rates

End-of-grade exam scores

Student confidence, investment, and progress

HOW IT WORKS

- 1 Monica scored below basic on the 7th grade ELA and math assessments, so she has an additional period in her schedule where she alternates between remediating ELA and math skills.
- 2 In the extra period, Monica completes a personalized learning plan that aligns with the instruction in her regular ELA and math periods.
- 3 The learning plan identifies and addresses her specific learning gaps, all the way down to elementary-level concepts. Instruction, practice, and review filled with supports and interactivity help her reach grade level quickly.

Bonus Pro-Tip

Monica's learning dashboard lets her MTSS, math, and ELA teachers coordinate seamlessly based on real-time insight into her progress by topic and standard.

OUTCOMES SPEAK FOR THEMSELVES

Middle school student achievement increased

30

PERCENTILE POINTS

over the past 5 years on state assessments in math.

Mineral Point School District, WI

THE RESULT

The Teacher

Monica's intervention teacher and classroom teachers see the benefit of coordinated instruction that fills gaps and allows her to master 8th grade standards.

The Student

The extra time in ELA and math helps Monica learn and be ready for her core classes, perform better on year-end tests, and feel successful.

What a difference. Monica was shy and often frustrated, but now she keeps up and looks much happier.

Mr. Jackson

I wasn't sure I could do it, but now I actually feel good about school!

Monica
