

“
I work with students who have not been successful in the past but have found success because of Apex Learning digital curriculum.
”

— Amanda Wiegert
Transitions Program Teacher
Northstar High School
Nebraska

For many at-risk students, failure to keep up in 9th-grade courses may be a key factor in the decision to drop out of high school. To address this issue, a growing number of schools are implementing programs designed to provide support for students making the critical transition from middle to high school. Apex Learning digital curriculum can help educators meet the diverse needs of transitioning students and put them on the path to graduation.

Basic Math Skills

Math Foundations courses were specifically developed for students ages 13 and older to provide remediation of required math skills. Carefully paced, guided multimedia-rich instruction is accompanied by interactive practice, preparing students for success in high school math courses.

Foster Success in Algebra I

Apex Learning online courses in Introductory Algebra and Algebra I offer an individualized learning experience to support success for at-risk students in mastering this critical gateway subject.

Develop Proficiency in Reading and Writing

Designed for adolescents who are reading below proficient, English Foundations courses offer structured remediation and practice in reading and writing to prepare students for grade-level high school courses.

Success in 9th-Grade Coursework

For below-proficient readers, standards-based Literacy Advantage courses in math, science, English, and social studies provide the necessary scaffolding to support comprehension of grade-level academic content and develop their capacity as readers and writers. The learning scaffolding in Apex Learning Core comprehensive courses will benefit more proficient readers.
