

“  
*These are students who didn't succeed in a traditional classroom environment. The Apex Learning digital curriculum allowed them to work at their own pace to complete challenging coursework and earn the credits they needed.*”

— Dianne Vaez  
K-12 Curriculum, Instruction,  
and Assessment Director  
Temecula Valley Unified School District

## Provide Alternatives for Non-Traditional Students

The traditional classroom experience is not for every student. High schools seeking new ways to reach such students are increasingly implementing Apex Learning digital curriculum solutions to individualize instruction and motivate and engage students. In many cases, students are experiencing academic success in rigorous high school courses for the first time.

## Differentiated Instruction

Digital curriculum from Apex Learning makes it possible to individualize instruction to address diverse student needs. Students can progress at their own pace, taking as much — or as little — time as necessary to master the material. Direct instruction incorporates multimedia along with instructional text to provide students with multiple representations of concepts as well as address their different learning styles. Formative assessments help students to gauge their understanding and improve performance, while summative assessments chart progress and skill development. Unit-level diagnostics allow students to move quickly over material they have previously mastered.

## Multiple Course Pathways

Apex Learning digital curriculum is designed to support academic success for all students. Foundations courses meet the needs of students who are not prepared for grade-level academic challenges. Literacy Advantage courses integrate literacy scaffolding to support below-proficient readers in mastering required content. Core courses meet the needs of students as they endeavor to master rigorous content.
