Technology Courses

Coding, Design, and Animation
for Grades 6-12

Technology is Opportunity

Apex Learning Technology Courses give students the opportunity to go beyond being users of technology to becoming creators themselves. The creative, technical, problem solving, and critical thinking skills they develop are applicable to any career, technology related or not.

Students as Creators

Students complete projects such as developing an iOS or Android app, creating a 3D video game, or designing a fashion collection. While doing so, they gain experience with the industry-standard tools used by professionals.

Access to Expert Support

Because many teachers may not have experience with the professional tools used in these technology courses, students have access to support from experts online to ensure they can successfully complete their projects and coursework.

> "When I graduate, it'll give me an understanding of how game design works and how I could potentially use it to make a college decision."
>
> —Zach, Student
> Wautoma High School

Technology Courses Catalog

Design

- 3D Game Design
- 3D Printing & Modeling
- Fashion Design

Animation

- 3D Animation
- 3D Character Animation

Coding

- Mod Design
- 3D Game Development
- App Design
- Adventure Maps Expansion Course
- Server Design
